International Journal for
Numerical Methods in Engineering

Volume 68 Number 1 • 1 October 2006

Optimal synthesis for a continuous prescribed dexterity interval of a 3-dof parallel planar manipulator for different prescribed output workspaces: A. M. Hay and J. A. Snyman 1

Linear matching method on the evaluation of plastic and creep behaviours for bodies subjected to cyclic thermal and mechanical loading: H. Chen and A. R. S. Ponter 13

Block diagonalization of adjacency and Laplacian matrices for graph product; applications in structural mechanics: A. Kaveh and H. Rahami 33

A general discontinuous Galerkin method for finite hyperelasticity. Formulation and numerical applications: L. Noels and R. Radovitzky 64

A formulation of conserving impact system based on localized Lagrange multipliers: Y. Miyazaki and K. C. Park 98

A 2.5D finite element model for bending and straightening in continuous casting of steel slabs: F. Pascon, S. Cescotto and A. M. Habraken 125

Volume 68 Number 2 • 8 October 2006

A constrained reproducing kernel particle formulation for shear deformable shell in Cartesian coordinates: J.-S. Chen and D. Wang 151

Pseudospectral method for MHD pipe flow: A. Carabineanu and E. Lungu 173

The boundary recovery and sliver elimination algorithms of three-dimensional constrained Delaunay triangulation: Z. Guan, C. Song and Y. Gu 192

Development of finite difference schemes near an inflow boundary: E. Sousa 210

Continuum-based design sensitivity analysis and optimization of nonlinear shell structures using meshfree method: K. Yi, K. K. Choi, N. H. Kim and M. E. Botkin 231

Mitigating the integration error in numerical simulations of Newtonian systems: P. Gurfil and I. Klein 267

Volume 68 Number 3 • 15 October 2006

Error estimation of stress intensity factors for mixed-mode cracks: L. Gallimard and J. Panetier 299

Non-linear sloshing in partially liquid filled containers with baffles: K. C. Biswal, S. K. Bhattacharyya and P. K. Sinha 317

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services:

Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index® (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Emerald), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematics Abstracts.

IJNMBH 68 1–1386 (2006) • ISSN 0029-5981

Elasto-plastic finite element analysis of shells with damage due to microvoids: P. Woelke, G. Z. Voyiadjis and P. Perzyna 338

A new finite element formulation for internal acoustic problems with dissipative walls: W. Larbi, J.-F. Deü and R. Ohayon 381

Volume 68 Number 4 • 22 October 2006

Iterative solution of the random eigenvalue problem with application to spectral stochastic finite element systems: C. V. Verhoosel, M. A. Gutiérrez and S. J. Hulshoff 401

Wave propagation and localization problems in saturated viscoplastic geomaterials: M. Mabssout, M. I. Herreros and M. Pastor 425

Generic domain decomposition and iterative solvers for 3D BEM problems: F. C. Araújo, K. I. Silva and J. C. F. Telles 448

Non-linear analysis of structures using high performance hybrid elements: C. S. Jog and P. P. Kelkar 473

Volume 68 Number 5 • 29 October 2006

Charge distribution on thin conducting nanotubes—reduced 3-D model: H. Chen and S. Mukherjee ... 503

Accelerating iterative solution methods using reduced-order models as solution predictors: R. Markovinović and J. D. Jansen 525

Combining interface damage and friction in a cohesive-zone model: G. Alfano and E. Sacco 542

A parallel *hp*-FEM infrastructure for three-dimensional structural acoustics: S. Dey and D. K. Datta 583

Volume 68 Number 6 • 5 November 2006

Asymptotic numerical methods for unilateral contact: W. Aggoune, H. Zahrouni and M. Potier-Ferry 605

Parallel simulation of unsteady hovering rotor wakes: C. B. Allen 632

Solving inverse electromagnetic problems using FDTD and gradient-based minimization: E. Abenius and B. Strand 650

A direct algebraic method for eigensolution sensitivity computation of damped asymmetric systems: N. Guedria, H. Smaoui and M. Chouchane 674

Hybrid-mixed curved beam elements with increased degrees of freedom for static and vibration analyses: J.-G. Kim and Y.-K. Park 690

Volume 68 Number 7 • 12 November 2006

Optimized damage detection of steel plates from noisy impact test: G. Rus, S. Y. Lee, S. Y. Chang and S. C. Wooh 707

Radial point interpolation based finite difference method for mechanics problems: G. R. Liu, J. Zhang, H. Li, K. Y. Lam and B. B. T. Kee 728

A numerical study of wave structures developed on the free surface of a film flowing on inclined planes and subjected to surface shear: N. H. Shuaib, H. Power, S. Hibberd and K. Simmons 755

Bionics and fractal configurations in structural engineering: A. Tesar 790

Volume 68 Number 8 • 19 November 2006

Full-wave analysis of single cylindrical striplines and microstriplines with multilayer dielectrics: F. Bouttout, F. Lethimonnier and D. Le Bihan 809

On the numerical treatment of initial strains in biological soft tissues: E. Peña, M. A. Martinez, B. Calvo and M. Doblaré 836

On the *a priori* and *a posteriori* error analysis of a two-fold saddle-point approach for nonlinear incompressible elasticity: G. N. Gatica and L. F. Gatica 861

Stress integration procedures for a biaxial isotropic material model of biological membranes and for hysteretic models of muscle fibres and surfactant: M. Kojic, I. Vlastelica, B. Stojanovic, V. Rankovic and A. Tsuda 893

Volume 68 Number 9 • 26 November 2006

Efficient explicit time stepping for the eXtended Finite Element Method (X-FEM): T. Menouillard, J. Réthoré, A. Combescure and H. Bung 911

A triangular plate element for thermo-elastic analysis of sandwich panels with a functionally graded core: M. Das, A. Barut, E. Madenci and D. R. Ambur 940

On the enforcing energy conservation of time-finite elements for particle systems: Q. V. Bui 967

Scale-related topology optimization of cellular materials and structures: W. Zhang and S. Sun 993

Volume 68 Number 10 • 3 December 2006

Finite element study of the energy dissipation and residual stresses in the closed elastic deformation path: B. Abbasi and M. H. Parsa 1013

On the evaluation of damping in MEMS in the slip–flow regime: A. Frangi, G. Spinola and B. Vigna 1031

Modelling deformation behaviour of polyelectrolyte gels under chemo-electro-mechanical coupling effects: J. Chen and G. Ma 1052

A surface Cauchy–Born model for nanoscale materials: H. S. Park, P. A. Klein and G. J. Wagner 1072

A numerical method for the analysis of flexible bodies in unsteady viscous flows: J. Pederzani and H. Haj-Hariri 1096

BOOK REVIEW 1113

Volume 68 Number 11 • 10 December 2006

Krylov precise time-step integration method: T. C. Fung and Z. L. Chen 1115

Four-node semi-EAS element in six-field nonlinear theory of shells: J. Chróścielewski and W. Witkowski 1137

Adaptive computational methods for variational inequalities based on mixed formulations: F. T. Suttmeier 1180

Volume 68 Number 12 • 17 December 2006

Advanced 4-node tetrahedrons: R.Tian, H. Matsubara and G. Yagawa 1209

A simple finite element model for vibration analyses induced by moving vehicles: S.-H. Ju, H.-T. Lin, C.-C. Hsueh and S.-L. Wang 1232

Potential field based geometric modelling using the method of fundamental solutions: R. Tankelevich, G. Fairweather, A. Karageorghis and Y.-S. Smyrlis 1257

Precise integration strategy for aseismic LQG control of structures: G. Song, J. Lin, F. W. Williams and Z. Wu 1281

Volume 68 Number 13 • 24 December 2006

Algorithmic formulation and numerical implementation of coupled electromagnetic-inelastic continuum models for electromagnetic metal forming: M. Stiemer, J. Unger, B. Svendsen and H. Blum 1301

Locking and hourglass phenomena in an element-free Galerkin context: the B-bar method with stabilization and an enhanced strain method: D. P. Recio, R. M. N. Jorge and L. M. S. Dinis 1329

The intrinsic XFEM: a method for arbitrary discontinuities without additional unknowns: T.-P. Fries and T. Belytschko..... 1358
